

ATS CONTINUING EDUCATION SEMINAR  
2023 Mixed-Topics - Live In-Person - Long Island,  
NY  
Thursday, December 07, 2023  
Maggiano's Little Italy - Roosevelt Field  
600 Garden City Plaza , Garden City, NY 11530

**07:45 AM**      **Registration & Continental Breakfast**

**08:00 AM**      **An Architect's Guide to Sound Isolation & Steel Framing**

A basic course on the role that cold-formed steel framing products play in sound isolation.

Anthony M Stazzone  
MarinoWare    Provider #: J835  
AIA #:MW005 HSW

**09:00 AM**      **PreFabricated Fireproof Columns**

Structural fire protection guards essential structural components from the devastating effects of fire. This course examines the various active and passive fireproof methods that are available with a focus on the features, types, and design considerations of prefabricated fireproof structural columns designed for exposed exterior and interior load-bearing columns. We also discuss Glass Fireproof Columns and possible applications.

Patricia Brindle  
Fire-Trol    Provider #: 10008964

**10:00 AM**      **Break**

**10:20 AM**      **How It's Made: Today's PVC**

PVC products have been around for 100 years. They're common in the construction industry because of their durability and long life. But old PVC manufacturing practices still cause concern for some of today's specifiers. This course will address those concerns head-on. We'll talk about today's manufacturing processes and how recycling is transforming the industry. You'll see how PVC resin becomes a strong and beautiful product using the example of vinyl fencing. With the understanding of today's regulations, collaboration, and green-building practices, you'll have the confidence to specify today's PVC products.

**11:20 AM**      **Revolution in Solutions for Concrete Cure, Finish, Flatness and Moisture Control**

This program explores the many uses of integrally troweled cure products to solve practical and common problems frequently occurring in buildings, roads and specialized industrial and municipal complexes. Such as moisture damage to floor coverings, control joint curling, delamination and abrasion resistance.

**12:20 PM**      **Lunch**

01:10 PM

## **Prefabricated Ornamental Railing Systems**

This course is designed to teach the attendee the differences between custom ornamental railing systems fabricated locally versus those fabricated 100% offsite.

Kevin Harris

Kevin Harris is the Director of Sales & Marketing at AGS Stainless, Inc. (AGS), a railing manufacturer specializing in 100% offsite fabrication of custom railing systems. Before his position with AGS, Mr. Harris founded 4 industry-leading firms including 2 information technology firms; one specializing in the creation of web-based process management tools for Fortune 100 corporations and one that specialized in building predictive modeling applications for federal agencies. He also founded a real estate development firm that spearheaded the restoration and redevelopment of a historic seaport communities' downtown waterfront, as well as organizing and founding a state-chartered, community bank; which when it opened, was the fastest bank to receive a charter in the history of Washington State. Mr. Harris currently serves as Past Chair, of the American Institute of Architects National Custom Residential Architects Network (CRAN). He also serves as Past Co-chair, of the Board of Trustees for the National Association of Home Builders Leading Supplier's Council (NAHB LSC).

## **Design Considerations for Safe Automated Overhead Door Environments**

Design safe spaces by assessing hazards associated with motorized overhead doors. Learn ways to minimize post-occupancy risk factors by considering the overall automated door environment.

Glenn Smith

Miller Edge    Provider #: K131  
AIA #:MIL2023 HSW

03:20 PM

## **Composite Decking and Sustainable Design**

Composite Decking and Sustainable Design summarizes composite deck manufacturing, specification and various construction applications. Composite decking materials have become a viable and affordable choice in commercial and residential applications, resilient to the elements and sustainable over time. We will highlight the aesthetic opportunities and design values available to achieve a design that is healthy/green and safe for years. We will review: Moisture Resistance, Slip Resistance, Thermal Expansion, Hardness and Weight, and Load Capacity.
