08:05 AM **Specifying Successful Ceramic Tile Installation, Beyond TCNA & ANSI**

Learn how to properly specify a successful installation of ceramic and stone tiles. The focus of the program will be on industry standards, i.e., TCA (Tile Council of North America) and ANSI (American National Standard for Installation of Ceramic Tile); changes in and review of important TCNA and ANSI standards, changes in the TCNA Handbook, important definitions, and important concepts and trends you should be aware of to ensure a successful installation.

09:10 AM **Vertical Material Handling Systems & Methods**

This course explores the various types of vertical material handling systems that are available; what kinds of end users and buildings reap the most benefits; and the wide range of objects that are transported vertically, between the floors of any structure. National code applications are also discussed.

10:40 AM **Enhancing Outdoor Living - Current Trends & The Role of Aluminum Shade Structures (1)**

This course delves into the increasing and expanding role of outdoor living and its importance in households, businesses, and communities. Reviewed are the styles and specification considerations of aluminum shading products. The focus is pergolas and cabanas, made with insulated, dual-walled aluminum louvers that seal completely to block rain and snow and complement any architectural style.

The Benefits of 100% Offsite Fabricated Stainless Steel Railing Systems

Explore the advantages of integrating 100% offsite fabrication into the design of the ornamental railing you specify in your architectural projects.

When compared to local fabrication, Offsite fabrication of custom-designed railing systems not only dramatically improves product quality, it also minimizes project waste, reduces product costs, and streamlines construction processes. *Offsite Fabrication = Value Engineering!*

In this presentation you will learn how architects, designers, and engineers can reduce overall project costs and improve project outcomes by specifying architectural products which have been custom-designed to precisely fit each project, and then prefabricated to completion offsite, while helping builders and contractors achieve greater efficiency.

Milena Martinez Vega

Marketing Lead | Brand Strategist Milena Martinez Vega is a passionate professional with a deep understanding of prefabricated railing systems and the advantages offsite fabricated stainless steel railing systems bring to architectural projects. As former "amazonian", she served at Amazon Web Services (AWS) as a Project Manager in the Public Sector for Latin America, Caribbean and Canada Regions. Originally from Barcelona, Spain, Milena moved to the United States in 2009 in pursuit of her career aspirations. With a Keen eye for aesthetics and a passion for design, she joined AGS Stainless, a renowned manufacturer of custom-designed stainless steel railing systems, in 2014. Over the years, Milena's curiosity and enthusiasm have driven her to explore various roles within AGS Stainless, and currently serving as a Brand Strategist and Marketing Lead. Her attention to detail and commitment to excellence have earned her recognition within the organization.
