08:00 AM [Welcome, Credits, and Certificates](#)

08:10 AM **Outdoor Kitchen Design with Stainless Steel Cabinetry**

This course is designed to introduce the recipient to outdoor living with a focus on the outdoor kitchen.

The recipient of the course will learn the types of materials used as well as cabinetry, finishes and door styles available. In addition, they will learn what type of other elements are available in today's outdoor kitchen.

Vicki Currier

Danver - Brown Jordan Outdoor Kitchens Provider #: 404108250

AIA #: DBJOK101b HSW

09:10 AM **Privacy Partitions in Today's Commercial Restroom**

In this program, we explore the current trends and issues changing the way we design restrooms. We'll discuss what users want in a restroom experience, demand for increased privacy, and solutions for making your restroom the best room.

John McKeon

Scranton Products Provider #: 40107701

AIA #: ISP10I HSW

10:20 AM **Understanding Advanced Wall Systems with Continuous Insulation**

This session explores evolving trends in building enclosure technology, and subsequent changes in energy efficient building design; with especial focus on the role of continuous exterior insulation (CI). The net energy savings realized in a properly insulated building are by now well understood, and these savings are increasingly being required by stringent local building and energy codes. Current building science research and field monitoring data will be presented, to demonstrate how the effective R value of various insulating materials perform and change in differing regional climates, temperature ranges, and seasonal conditions. Strategies for designing and constructing highly insulated and cost effective wall assemblies while still minimizing thermal bridging are also discussed.

Omar Abu Holy

Rockwool Provider #: K269

AIA #: RWNA202 HSW | GBCI (USGBC/CAGBC) #: 920023529

11:20 AM **Benefits of Ultra Low Permeability Concrete in the Building Envelope – An Integral Approach.**

The exceptional durability of portland cement concrete is a major reason why it is the world's most widely used construction material. But material limitations, design and construction practices, and severe exposure conditions can cause concrete to deteriorate, which may result in aesthetic, functional, or structural problems. The Portland Cement Association prescribes proper concrete coverage of reinforcing steel and a Low Permeability concrete mix design as the primary goals for "Best Practice". A talented, seasoned contractor is the answer to the first..... Vapor Lock enhanced concrete may be a reasonable answer to the second.

Scott Bergsbaken

SPG (Specialty Products Group) Provider #: K540

AIA #: SPG003 HSW | GBCI (USGBC/CAGBC) #: 920014710
