03:20 PM **Extra-thick porcelain for innovative landscape architecture**

There are many building materials on the market today. Why do you want to choose porcelain pavers for your external projects? This one-hour course offers the participants the opportunity to learn about porcelain pavers in 2cm (3/4"), 3cm (1-1/8"), and 5cm (2") for dry-lay installations over aggregates and with pedestal systems in different parts of the country.

During this hour-long session, participants will have the opportunity to view different outdoor living spaces installations and be inspired with best practices and creative inspirations to expand the use of porcelain pavers. Case studies will be examined through the presentation.

## Sintered Stone: A New Material Category Enters the Market

Sintered stone is a new material so unlike ceramic, or natural stone that it warrants its own category for building standards, which are now being developed in Europe. This course demonstrates that sintered stone has the workability of natural stone with the sustainability and performance of ceramic. This new material is durable to whatever threat may come, either by nature or humans. The course shows how sintered stone is used in a wide variety of indoor and outdoor applications from countertops to flooring, walls, cladding, and more.
