

ATS CONTINUING EDUCATION WEBINAR
Duradek US - Waterproofing Roof Decks and
Balconies with Walkable PVC Membranes
Friday, September 06, 2024

12:00 PM [Welcome, Credits, and Certificates](#)

12:05 PM **Waterproofing Roof Decks and Balconies with Walkable PVC Membranes**

Provides an overview of walkable, waterproof roof deck membranes and roofing systems, including a discussion of the key principles of deck design, design considerations, and how to install and specify roof deck membrane systems. This program will be extremely beneficial to architects, specifiers, and contractors involved in single and multiple-family homes that include decks, balconies, and rooftop decks.

Chad Monett

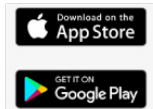

Chad Monett came to Duradek with 36 years of construction knowledge and project management experience in both residential and commercial construction. Chad was a construction consultant providing investment and general construction referrals in Central America for over 3 years. He has been a liaison with federal, state and local government agencies on numerous construction projects addressing compliance issues. Chad has conducted numerous AIA presentations and supports our current Distributors and Dealers as well as introducing Duradek to potential new installers.
